

SOFTWARE LICENSE AGREEMENT: VFX STUDIO TEXTURE LIBRARY

Terms of Use of the VFX Studio Library

Effective Date: [Effective Date]

1. PARTIES AND IDENTIFICATION

LICENSOR (Author & Administrator):

Roblox Username: [k3rxse] (ID: [2778426872])

Discord: [limited_qj] (ID: [884419050711699456])

LICENSEE:

Developer Username ("Roblox"): _____ (ID: _____)

Discord: _____ (ID: _____)

GROUP INFO (complete only if the Software is published or distributed on behalf of a Roblox Group; otherwise leave blank):

Community Name ("Roblox Group"): _____ (ID: _____)

Roblox Username of the Group's Owner: _____ (ID: _____)

Discord of the Group's Owner: _____ (ID: _____)

LICENSED SOFTWARE:

Licensed Software: _____ (ID: _____)

2. PROJECT STATUS AND COPYRIGHT

2.1. Collective Project: The VFX Studio Texture Library is a collective work comprising:

- (a) personal works created by the Licensor;
- (b) works created by community members specifically for the VFX Studio project, contributed with the creator's knowledge and consent; and
- (c) materials gathered from open community sources (including Discord and similar channels).

The Licensor maintains a public registry of asset identifiers for the Library on GitHub, but does not track the provenance or license status of each individual asset in category (c), and does not warrant clear title to each such asset.

2.2. Right of Management: The Licensor administers the Library, including licensing, moderation, and removal of assets, on behalf of the contributors described in Section 2.1(b). For assets described in Section 2.1(c), the Licensor's role is limited to curation and takedown administration as set out in Section 6.

2.3. No Modification of Library Assets: Except where expressly required under Section 6.3 to replace outdated assets with the current version provided by the Licensor, the Licensee may not modify, edit, adapt, enhance, re-export, upscale, downscale, recolor, remove backgrounds from, optimize, compress, or otherwise alter any Library asset or any local copy of the Library. The Library is

provided in its final and optimized form, and any modification of its assets is prohibited unless the Licensor has given prior written permission.

2.4. Nature of the Library: The Library is a living collection maintained and updated by the Licensor over time, including additions, removals, and modifications of assets and metadata in the GitHub registry referenced in Section 2.1. The license granted under this Agreement automatically extends to the Library as it exists from time to time; a new signed copy of this Agreement is not required solely because the Library's content has changed. A new signed copy is required only where the terms of this Agreement itself are revised, as set out in Section 8.4.

3. GRANT OF LICENSE

3.1. Scope of Grant: Subject to the Licensee's continued compliance with this Agreement, the Licensor grants the Licensee a personal, non-exclusive, non-transferable, revocable, royalty-free license to use the Licensed Software identified in Section 1 ("the Software"), specifically to:

(a) use of assets and data from the Library within the Software, without any right to modify them, except where expressly required under Section 6.3; and

(b) distribute the Software to end users in compiled/integrated form, subject to the Licensee's compliance with Section 4 in its entirety.

The license described in this Section is revocable solely in the manner and on the grounds set out in Section 6 of this Agreement.

3.2. Reservation of Rights: No right, title, or interest in the Library is transferred to the Licensee under this Agreement. All rights not expressly granted here are reserved by the Licensor.

3.3. No Modification of the Library Itself: The license granted in Section 3.1(a) extends only to the Licensee's own local copies of assets as used within the Software. It does not grant the Licensee any right to edit, add to, remove from, or otherwise modify the Library itself (the Licensor's central asset collection referenced in the GitHub registry). The Library is maintained exclusively by the Licensor.

3.4. Single-Software Limitation: This license is limited to use of the Library within the specific Software identified in Section 1. Use of the Library — in whole or as a compiled pack/dataset — within any other plugin, project, or software, whether by the Licensee or by any other developer, requires a separate license agreement with the Licensor, even where the Licensee already holds a valid license for a different Software.

3.5. No Assignment by Licensee: The Licensee may not transfer, assign, sell, or otherwise convey this Agreement or the rights granted hereunder to any third party — including transferring the Software to another developer, transferring the Roblox/Discord account under which the Software was created to another person, or transferring ownership or primary administrative control of the community (Roblox Group) identified in Section 1 to a person other than the Licensee. Any such transfer of the Software, the corresponding account, or control of the community automatically and immediately terminates the license granted to the original Licensee as of the moment of such transfer — regardless of whether the new owner enters into its own agreement with the Licensor. Upon termination of the license under this Section, the original Licensee has no right to use the Library in any form (with the same consequences as under Section 6.2), and the new owner must enter into a separate Agreement with the Licensor to lawfully use the Library within this Software.

3.6. Licensee Identification: The license is personal and is granted to the Licensee identified by the Roblox ID and Discord ID specified in Section 1 of this Agreement. Where the Software is published or distributed on behalf of a Roblox Group, the Roblox ID of the Group's owner and the applicable Group ID shall be specified. The Group ID identifies the Roblox Group on whose behalf the Software

is published and does not independently grant any rights under this Agreement to other members of the Group.

3.7. Change of Identification Data: A change of the developer's username, the community name, or the Discord username identified in Section 1 does not, by itself, require execution of a new Agreement. A new Agreement is required only if any controlling identifier — Roblox ID, Group ID, or Discord ID — changes. From the moment such a controlling identifier changes, the data specified in Section 1 no longer matches the Licensee's actual identifiers, and the license granted under this Agreement does not extend to the Licensee under the new identifier until a new Agreement is executed. This Section applies only where the change of identifier is made by the same person or community originally identified in Section 1; if the Licenser cannot reasonably establish such identity, the consequences set out in Section 3.5 apply instead.

3.8. Integrity of Licensee-Entered Data: All data in Section 1 relating to the Licensee is entered exclusively by the Licensee. The Licenser may not enter, change, add to, or otherwise edit this data on the Licensee's behalf — including with the Licensee's consent. The entry of such data by a person identifying themselves as the Licensee is, by itself, confirmation that this person personally entered the data and reviewed the terms of this Agreement.

4. MANDATORY RESTRICTIONS AND TERMS

4.1. Gratis Status: This license is granted free of charge and remains in effect indefinitely, subject to the Licensee's compliance with the terms of this Agreement; non-compliance may result in termination of the license in the manner set out in Section 6.

4.2. Integrity of the Library: The Licensee may obfuscate, minify, encrypt, compile, package, or otherwise modify the code and internal structure of the Software, provided that the Licensee does not modify, replace, remove, add to, or otherwise alter the Library itself. The Licensee may not incorporate additional assets into the Library or otherwise change the composition or contents of the Library.

4.3. No Redistribution of Library Source: The Licensee may not resell, sublicense, gift, share, or otherwise transfer the Library's raw source files, asset structure, or dataset — in whole or in part — to any third party, including other developers, separately from the compiled Software. This restriction does not prohibit ordinary distribution of the Software itself to end users under Section 3.1(b).

4.4. No Attribution Theft: The Licensee may not claim authorship or ownership of the Library or any part of it. The absence of individual author tags in the current version of the Library does not grant any right to claim ownership.

4.5. No Expansion or Rebranding of the Library: The Licensee may not supplement, merge, combine, or otherwise expand the Library with additional assets, whether self-created or obtained from third parties, where the resulting collection is presented, represented, distributed, advertised, or maintained as the Library, an update, expansion, edition, derivative edition, enhanced version, community edition, successor, or any other version or continuation of the VFX Studio Library. This restriction does not prohibit the Licensee from using independent asset collections separately within the Software, provided that such collections remain clearly separate from the Library and are not represented as forming part of the Library.

5. AUDIT RIGHTS AND NOTIFICATIONS

5.1. Library Integrity Verification: The Licenser may request verification of the Library used by the Licensee at any time to verify compliance with this Agreement, including to confirm that the Library

has not been modified, replaced, removed, supplemented, or otherwise altered in violation of this Agreement. The Licensee shall provide the requested Library or other information reasonably necessary for such verification within 14 days of the request. Such verification shall be limited to the Library and materials necessary to verify its compliance and shall not require disclosure of unrelated source code or other proprietary materials of the Licensee.

5.2. Notices: Notice of termination or any other formal notice under this Agreement is deemed delivered upon being sent to the Licensee's Discord ID identified in Section 1.

5.3. Relationship to Platform Policies: This Agreement operates independently of, and in addition to, the Roblox Terms of Service and Discord Terms of Service. A breach of this Agreement may, depending on its nature, also constitute copyright or intellectual property infringement under applicable law, in which case the Licensor may pursue remedies available under this Agreement and applicable copyright law, including the relevant platform's own IP/copyright reporting process (e.g., DMCA), subject to the limitations on such reporting set out in Section 6.1.

6. ENFORCEMENT

6.1. Enforcement Actions: For breaches of this Agreement (including modification, replacement, removal, supplementation, or other unauthorized alteration of the Library, unauthorized redistribution of Library source files, misattribution, or unauthorized representation of an expanded or combined collection as the VFX Studio Library), the Licensor's remedy is termination of the license under Section 6.2, after which any further use of the Library by the former Licensee is unauthorized. Separately, where the Licensor holds the underlying rights to the affected asset (i.e., assets described in Section 2.1(a) or 2.1(b)), the Licensor may file DMCA takedown notices or equivalent platform reports for unauthorized use or distribution of that asset. The Licensor does not represent that it holds enforceable copyright in assets described in Section 2.1(c) and will not file DMCA notices asserting ownership of such assets.

6.2. Termination: A confirmed breach of this Agreement, or an unjustified refusal to provide the information required under Section 5.1, terminates the license immediately upon notice. From the moment of termination, the Licensee has no right to use the Library in any form. The Licensee must remove all Library materials from the Software (by discontinuing use of the repository link referenced in Section 6.4(a) and/or deleting the local copy referenced in Section 6.4(b)) within 48 hours of such notice; this 48-hour period is a technical window for removal only and does not authorize continued use of the Library, whether during that period or after it has elapsed. Such removal is carried out at the Licensor's direct instruction under this Section, not on the Licensee's own initiative.

6.3. Third-Party Claims and Asset Updates: If a third party asserts a good-faith claim, identifying the specific asset by its ID in the Library's public GitHub registry, that an asset infringes their rights (including assets described in Section 2.1(c), for which the Licensor does not warrant clear title), the Licensor shall remove or replace the affected asset within the Library and notify the Licensee accordingly. Within 72 hours of such notice, the Licensee must:

- (a) if using the repository link under Section 6.4(a) and that link has changed, update it to the current link provided by the Licensor; or
- (b) if using a local copy under Section 6.4(b), fully replace it with the version provided by the Licensor, without making any changes of its own.

This process applies to the individual asset in question and does not by itself terminate the Licensee's rights to the remainder of the Library.

6.4. Use of the Local Copy: The Library may be connected to the Software in one of two ways:

- (a) by reference to the file in the GitHub repository where the Library's assets are stored, or
- (b) by copying the data from that repository directly into the Software's script as a local copy, used as a fallback connection method in case the Software cannot reach the file in the repository.

The Licensee may use the local copy under either method. All changes to the composition of the Library are made exclusively by the Licensor; the Licensee may not, under any circumstances, independently edit, modify, add to, or delete the contents of the local copy. When the Library is updated, the Licensor shall notify the Licensee in the manner set out in Section 5.2, and the Licensee must replace its local copy with the current version provided by the Licensor.

7. DISCLAIMER OF WARRANTY; LIMITATION OF LIABILITY

7.1. No Warranty: The Library is provided "AS IS", without warranty of any kind, express or implied, including but not limited to warranties of merchantability, fitness for a particular purpose, and non-infringement.

7.2. Limitation of Liability: To the maximum extent permitted by applicable law, the Licensor shall not be liable for any direct, indirect, incidental, or consequential damages arising from use of, or inability to use, the Library.

8. GENERAL PROVISIONS

8.1. Severability: If any provision of this Agreement is held invalid or unenforceable, that provision shall be limited or eliminated to the minimum extent necessary, and the remaining provisions shall remain in full force and effect.

8.2. Assignment by Licensor: The Licensor may transfer this Agreement, together with the Licensor's rights and obligations regarding the Library, to a successor administrator of the VFX Studio project. Such a transfer does not by itself alter the Licensee's rights or obligations under this Agreement.

8.3. Integrity of this Agreement: The Licensee may not alter, edit, delete, or add to the text of this Agreement. Any copy of this document that differs from the final version of the Agreement signed by both parties is void and has no legal effect between the parties; the terms actually agreed remain those of the final, unaltered version signed by both parties. Each party retains an electronic copy of the Agreement signed by both parties, and in the event of any discrepancy between copies, the final version signed by both parties is controlling.

8.4. Amendment and Supersession: The Licensor may revise, update, or reissue the terms of this Agreement at any time, in the Licensor's sole discretion, with notice given in the manner set out in Section 5.2. Such changes do not alter the terms of an Agreement already concluded between the parties retroactively. Instead, a new version establishes new conditions for the further granting of the right to use the Library. From the effective date of a new version, any previously signed version of this Agreement between the Licensor and the Licensee ceases to authorize further use of the Library. Continued use of the Library requires the Licensee to sign the then-current version of this Agreement; use of the Library under a superseded version after a new version has been issued is unauthorized and subject to Section 6.

8.5. Electronic Copy: Each party shall retain an electronic copy of the Agreement signed by both parties.

9. GOVERNING LAW

This Agreement shall be governed by and interpreted in accordance with the laws of the Russian Federation, without regard to conflict-of-law principles, to the extent such law does not conflict with the mandatory platform policies of Roblox Corporation and Discord Inc.

10. FORMATION OF AGREEMENT

This Agreement enters into force only upon signature by both the Licensor and the Licensee below. The Licensee must not install or use the Library within the Software prior to signing. A separate, individually signed copy of this Agreement is required for each Software under Section 3.4.
